

# **Sample Submission Requirements**

As a public health laboratory for the state of Utah, we perform environmental testing for state agencies and public water utilities. Being funded by tax dollars, we do not compete with commercial laboratories which are available to the public for a fee. Private wells and other individual testing is normally done at these commercial laboratories (see Yellow Pages under “Laboratories – Analytical, Laboratories – Medical, or Laboratories – Testing.”

For state agencies and public water utilities, our sample submission requirements are simple: call us at (801) 584-8400 and order the preserved containers necessary to accomplish your testing.

For more details, see our Client Service Manual.
